The monitoring will be carried out within the frames of a long-term pre-election monitoring, which entails monitoring of public meetings organized by political parties as well as realization of freedom of assembly and manifestation.

Monitors will observe all developments in Tbilisi and throughout the regions related to organization of the May 27, 2012 assembly and mobilization and relocation of participants.

GYLA and ISFED remain hopeful that the assembly will be held in a peaceful environment and the authorities will observe legal guarantees for assembly and manifestation.
