Georgian Young Lawyers' Association announces a tender for the creation of a website. We are looking for proposals from qualified web developers to create a modern and user-friendly website that meets the specific needs of our organization.

Job description:

- Design and development of a bilingual website adapted to the needs of people with disabilities and compatible with a variety of devices.
- Transferring information from the GYLA website www.gyla.ge to the new website.
- Simplifying and debugging the website search engine.
- Website design development (UI/UX);
- Customize the website to our organization's needs, including layout, color scheme, fonts, and branding elements.
- Integration of key functions such as contact, registration, consultation booking, and other forms, social media integration, and content management system (CMS) for easy updates.
- front-end and back-end development
- website optimization according to SEO standards;

Please include the following information in your proposal:

1. Company Profile: Briefly describe your company's history, expertise, and previous projects.
2. Proposed Proposal: Provide us with a detailed description of your proposed solution, including design concepts, features, and technologies to be used.
3. Timeline: Specify the estimated time frame for project completion, including
